

**SECTION I:**

**SYSTEM COMPONENTS**

**Panel Description**

The Met-Tile panel profile contains six, 1-1/2" high x 7.2" pitch corrugations for a total coverage of 36". Steps are 0.7" deep, spaced on 12" centers. Each panel includes in its configuration: alignment ridges, accumulation grooves, fastener dimples and sinusoidal end cuts. Panels are supplied in lengths as needed of 2 ft to 20 ft, in 1-ft increments, and are designed for vertical (eave to ridge) installation. Panel lengths of greater than 20 ft are available on a request basis.
